SANDEEP M S

Full Stack / Product / AI Platform Engineer

Bengaluru, India | LinkedIn | Portfolio | sandeepms.work@gmail.com | +91 9590387494

SUMMARY

Full Stack & AI Platform Engineer with **4+ years** building production systems end-to-end shipped **16+ systems** across real-time fantasy platforms, multi-tenant AI chat & voice products, FinOps analytics, and mobile apps. Strong ownership across **backend, frontend, mobile, and deployment**. Most recent: built **MCA Fantasy League**, the official T20 Mumbai cricket fantasy platform, serving **540K+ users**. Skilled in Fastify, NestJS, FastAPI, Next.js, PostgreSQL, ClickHouse, Redis, BullMQ, WebSockets, SSO/RBAC, and DPDP/DLT compliance.

SKILLS

Backend: Node.js, Fastify, NestJS, Express, Python, FastAPI, Java, Spring Boot, GraphQL, REST APIs, WebSockets, API design
Frontend / Mobile: React, Next.js, Angular, TypeScript, TailwindCSS, Ant Design, MUI, Framer Motion · Ionic React, React-native, Capacitor cross-platform mobile development (Android & iOS)
AI, Voice & Realtime: Generative AI, LLM-backed chatbots, Gemini API, Ultravox, Plivo, streaming pipelines · Socket.IO, WebSocket fan-out, real-time systems, BullMQ, Redis
Data: PostgreSQL, MongoDB, ClickHouse, Prisma ORM, Hibernate/JPA · relational & NoSQL databases, high-write schema design
Auth & Compliance: OAuth2, JSON Web Tokens (JWT), Single Sign-On (SSO), Role-Based Access Control (RBAC), Azure/Google SSO, Keycloak, AES-256-GCM PII encryption · DPDP Act, TRAI/DLT SMS, idempotency
Integrations & Infra: iSportz live feed, Salesforce, Razorpay, Gupshup SMS · Docker, Kubernetes, CI/CD (Continuous Integration / Deployment)

EXPERIENCE

Product Engineer - Turbostart *Apr 2025 – Present | Bengaluru*

- Built **MCA Fantasy League** the **official T20 Mumbai Cricket fantasy platform end-to-end across web, admin & mobile** on one backend serving **540K+ users** on the MCA fan platform.
  - **Real-time scoring engine** on live iSportz feeds, pushed over **WebSockets** with per-match channel scoping for match-day fan-out.
  - **Rotating-JWT auth**, idempotent admin operations, **AES-256-GCM PII encryption** (SHA-256 sidecar hashes), and **DLT-compliant** Playing XI SMS via Gupshup.
  - Powered prize-bearing contests across the **men's & women's T20 Mumbai finals**, with a **cumulative leaderboard** deciding the grand-prize winner (a motorcycle).
- Built the **fleet module** of **Optimile**, a **multi-tenant logistics SaaS** (Java 21, Spring Boot, PostgreSQL, React), as its **top contributor**: **compliance-gated dispatch**, garage & tyre workflows, **VAHAN/SARTHI**-filled onboarding, **optimistic-lock retries** and **ShedLock** jobs.
- Built **KAI ~ GUS**, a **multi-tenant AI chat & voice platform** (FastAPI, MongoDB, Next.js) owned auth + user service, role tokens, persona configs, white-labeled dashboards; created **KAI Insights**, a DIY bot demo generator (demo creation: **hours → seconds**).
- Developed **Luna** an **AI voice agent** (Ultravox + Plivo + Gemini) with inbound/outbound flows, transcript analysis & lead extraction; tuned streaming for **sub-second perceived latency**.
- Led **AuraML** as **team lead (5 engineers)** multi-realm Keycloak SSO, Razorpay billing automation, ECDSA-based licensing for enterprise deployments.
- Built **Cloudverse FinOps (Chargeback Module)** NestJS, GraphQL, ClickHouse, PostgreSQL & Prisma pipelines for **cloud cost allocation**; Next.js + Ant Design dashboards for real-time cost visibility and attribution modeling.
- Built **MyFLAME** (FLAME University) a **white-label, multi-tenant student-portal mobile app** (**React Native**, TypeScript) wrapping a **Salesforce Experience Cloud (LWR)** community, with **OAuth 2.0 + PKCE** auth, Google SSO, secure token storage, and session lifecycle management.
  - **Templatized the codebase** so a new university client ships as a ~2–4 day rebrand (stood up a second client from it); root-caused a full-stack **OAuth login failure** and a release-only Android crash (Kotlin/Swift, Gradle 8, CocoaPods) to deliver a clean **signed APK/AAB**.

Software Engineer - Turbostart *Aug 2023 – Mar 2025 | Bengaluru*

- Delivered the **T20 Mumbai ecosystem** website, Android/iOS apps, and a **real-time auction system** (Socket.IO) broadcast live on **Jio Hotstar**.
- Built the **Turbostart Investor Portal** (web + mobile) React, Node.js, Salesforce integration, Razorpay billing.
- Developed large-scale platforms **Startup Portal, Alumni Portal, Scout by TS** and shipped multiple production mobile apps with **Ionic React + Capacitor**.

Software Engineer - LearnCab (Nulurn Edutech) *May 2022 – Aug 2023 | Bengaluru*

- Built and maintained **learner-facing web applications** (React, Node.js); improved **performance, reliability & UX** across core learner flows.

Internships: Software Engineer Intern - LearnCab (Mar–May 2022) · Intern - Gofo Technologies (Jun–Aug 2019)

PROJECTS

PB Manager - Grain-Trading ERP (MB Groups) *Sole Developer | mbgroups.online*

- Built **PB Manager**, a **full-stack ERP** that digitized a grain/maize-trading business **end-to-end**, replacing a paper + Excel workflow with **9 modules across 18 Postgres tables** (Next.js, React, TypeScript, Supabase/PostgreSQL).
- Engineered **idempotent bill generation** and **concurrency-safe per-company invoice numbering** with per-invoice JSON snapshots; **server-side money math** with **Zod** as the single source of truth and **Vitest**-tested calc functions; **JWT (jose + bcrypt)** + **RBAC**.

EDUCATION

B.Tech, Computer Science — Presidency University, Bangalore (2017 – 2021)
